

1 Check-in on the kiosk

2 Confirm your information if it is correct

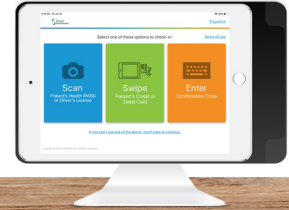

3 Insurance benefits generated (only pay what you owe)

4 Receive an eStatement with your balance (auto-debit the card-on-file or select other payment options)

If you prefer not to utilize Health iPASS, you can follow our old check-in and financial policies.

Your patient payment experience just got easier! We have partnered with Health iPASS to provide a better patient billing and collection process.

What is Health iPASS?

Health iPASS uses iPad kiosks to help patients check in and make payments quickly. You will be asked to swipe a credit or debit card and keep that information on file for that day's visit only. Once your insurance claim has been processed, any remaining balance can be paid with that stored payment information.

It's secure

Your personal and payment information is fully protected by the latest encryption methods. Your payment information is used for the authorized visit only and is deleted once payment has been made in full.

It eliminates charge/payment surprises

No more mailed bills, no more remembering to make payments. You will receive an email 7 days before your card-on-file is charged once your claim is processed. You can do nothing and pay with your stored information, or you may call the office and change your payment method at any time.
